

# CliniCare 100 HF

Reactive mattress high efficiency

# Effective pressure ulcer prevention

The CliniCare 100 HF reactive mattress combines the benefits of passive and active systems and offers effective pressure ulcer prevention to a broad spectrum of hospital care.

The foam layer creates better pressure relief as opposed to standard mattresses and the air cells further optimise pressure.

- 1 The air cells inside the mattress are filled with foam and automatically move air between each other without the attached unit depending on the patient's position.
- 2 Dedicated Heel zone with 7 degree slope maximising heel pressure offload.
- 3 Visco foam comfort layer is profiled thus improving pressure ulcer prevention. It offers high comfort when lying on the bed.

- 4 The edge of the mattress creates stable support for when the patient lies on or leaves the bed. The profiling makes it better for the air to circulate inside the mattress.
- 5 The top cover which is waterproof high moisture vapour permeable and 4 way stretch minimises friction and shearing forces.

## COMPRESSOR YES/NO

The mattress works effectively without or with a compressor depending on the condition and needs of a specific patient.

- When the compressor is not connected the air flows between cells according to the patient's movement with special valves to prevent rapid air loss from the system.
- If the compressor is connected, the cells begin to alternate in a 12 minute cycle, or constant low-pressure therapy can be set.

*CliniCare 100 HF system control unit (SCU) without Microclimate management MCM.*

## MICROCLIMATE MANAGEMENT MCM

MCM helps manage the general condition and health of the patient's skin by reducing the risk of moisture damage and allowing the body's natural thermoregulation process to take place.

- When the compressor is connected the moisture level is optimised at the patient's skin surface.

*Zipper with protective flap*

## EASY TO CLEAN MATERIALS

- 360 degree zipper for easy removal of top cover.
- Wipe clean design suitable for most hospital mattress cleaning products.
- Top cover can be laundered.

# CliniCare 100 HF

Patient

- Therapy according to the patient's needs
- Microclimate management
- Comfortable repose

- Variable setting and use
- Optimal infection control

Staff

Management

- High standard for an affordable price
- Effective pressure ulcer prevention
